SMALL CELL ENGINEERED STEEL POLES

Our Engineered Steel Pole product line offers various pole types for sleek, aesthetic poles that allow for a multitude of options to match existing infrastructures when deploying outdoor rated field equipment.

DESIGN FEATURES

- Designed in accordance with requirements of TIA-222 and other standards and specifications
- Can be manufactured for direct equipment mounting (via steel cross-arms) or without attachment points for field drilling or banding
- Standard port sizes of 3"x5", 4"x8" and 6"x8" other sizes available upon request
 - Pole top tenon for mounting antenna
 - Antenna side arm mounting options available

PRODUCT SPECIFICATIONS

- Round, square, multisided, fluted, straight or tapered pole options
- Standard height options from 20' to 40' AGL, other heights available upon request
- Foundation designed included based on geotechnical report or specified soil parameters
- Galvanized, with paint or powder coat finish options, color set by customer specifications
 - Luminary mounting option available
- Use with our SmartPier™ foundations system for quicker deployment
